Dear Hiring Manager,

Currently pursuing a Bachelor of Science in Computer Science at the University of Pittsburgh, I have maintained a GPA of 3.5 and gained valuable experience in software development and machine learning.

As an AI / Machine Learning Intern at the University of Pittsburgh's Learning Research and Development Center, I am leading the development of an AI model using Python to discern voice gender and age. This project, along with my role as a Junior Salesforce Administrator, where I enhanced data accuracy and security through SOQL and agile methodologies, demonstrates my ability to tackle complex problems and deliver solutions that enhance user experience and data integrity. Additionally, my work as a Web Development Intern allowed me to drive the creation of engaging user interfaces, further proving my commitment to delivering exceptional user experiences.

My internship in Web Development enabled me to significantly contribute to the design and implementation of user-friendly interfaces, aligning with my commitment to enhance user engagement through effective design. This experience has prepared me well for a role that emphasizes full-stack solutions, making technology more accessible and valuable to a broad audience.

I look forward to the possibility of discussing how my educational background, skills, and aspirations align with the goals of your Company. I am keen to contribute to, and grow with, your team, pushing the boundaries of technology. You can reach me at 401-327-2114 or dag197@pitt.edu. Thank you for considering my application. I am looking forward to your response.

Sincerely,

Danish Ghumman
